

In re Patent Application of:

**AGRAMA**

Serial No. 10/615,963

Filing Date: JULY 9, 2003

---

**In the Specification:**

Please insert the following paragraph between lines 11 and 12 on page 10 of the specification:

Another aspect of the present invention is directed to a skin protective device in which the adhesive layer is applied directly to a fluid-filled cell as readily appreciated by those skilled in the art. In other words, the skin protective device does not include a substrate, or alternatively, the substrate is integrated with the adhesive layer. In particular, the skin protective device comprises an adhesive layer having an inner surface to be adhesively secured to the skin of the person, and an outer surface. At least one fluid-filled cell has an outer surface to cushion the skin of the person, and an inner surface. The outer surface of the adhesive layer substantially covers the inner surface of the at least one fluid-filled cell. A removable layer may be on the inner surface of the adhesive layer for protection thereof prior to application to the skin of the person.
